Approved By:	IACUC
Approval Date:	06/09/2022
Version Number:	3

IG041: EXPIRED PROTOCOL

All protocols expire three years from the date of the original approval. If the protocol is in its third year and the project is ongoing, the PI should submit a new protocol for review and approval by the IACUC six weeks prior to the expiration date.

If a new protocol has not been approved by the expiration date, animals on the protocol will be transferred to the Campus Animal Resources (CAR) holding protocol (refer to Guideline IG013 – Management of Animals from Expired Protocols).

- All animals will be under control and management of the MSU Attending Veterinarian (AV).
- No research, teaching, testing, or breeding activities can be conducted.
- Payment of all per diem charges will remain the responsibility of the PI and the department. These charges cannot be charged to any federally funded grant.
