VERTEBRATE NON-MAMMALIAN EMBRYOS

If embryos are used beyond the halfway point of the incubation period, researchers should address humane euthanasia methods in the form to the committee. All research and teaching protocols that do not have an approved animal use form and involve vertebrate non-mammalian animal embryos should submit an Exemption Form (http://animalcare.msu.edu/iacuc-forms) explaining the project to the Institutional Animal Care and Use Committee for review and approval. In some circumstances, and after committee review, the committee may request that an animal use form be reviewed and approved for this project.
